About the Major Projects Inventory

The BC Major Projects Inventory contains summary information on major projects in the Province of British Columbia, Canada, that are over $15 million (Cdn.) capital cost, or $20 million in the Lower Mainland–Vancouver area.

Sources of MPI Information
Information sources include print and electronic media, developers, architects, general contractors, and government agencies (provincial, regional, municipal) as well as occasional site visits.

Project Location
Projects are listed according to eight regions: Vancouver Island/Coast, Mainland/Southwest (Vancouver area), Thompson/Okanagan, Kootenay, Cariboo, North Coast, Nechako, and Northeast. Maps showing the location of the regions and main population centres are included in the MPI. Projects are also listed according to the nearest population centre, which could be an unincorporated centre or a local government, e.g. a municipality.

Updates
New projects are added to the database every quarter. Projects already in the database are updated, at minimum, every six months unless there is no expected change in status for a longer period of time. Projects may be shown as updated with no change in information—this means that the information shown is still valid according to the verifying source.

Estimated Costs
Cost estimates are general estimates from the information sources used.

Start and Finish Dates
Start and finish dates for proposed projects are based on estimates from the sources used, or in some cases, on reasonable assumptions. These dates are revised as new information becomes available.

Project Status
Projects are listed by status: proposed, under construction, completed, or on hold. Notes on other status indicators are also included in the project description. Projects that are on hold for longer than two years are normally removed from the publication (although retained in our database). Cancelled projects are noted in the project descriptions as cancelled, then removed from the next issue of the MPI.

Highlights of the March 2004 Issue

There are 33 new projects proposed in British Columbia in the first quarter of 2004, totaling over $4 billion in potential new capital investment, if all the projects proceed. The MPI has added several more projects to its tracking that were registered last fall for BC Hydro's Vancouver Island Call for Tenders, requesting independent power producers to enter into a process which will conclude in August 2004.

Of the seven construction starts this quarter valued at over $800 million, (there were eight construction starts last quarter and 21 the previous quarter) the largest is North Vancouver's $400 million Mixed Use Development—the Pier—on the former Versatile Shipyard lands. Also starting construction were the Spectrum—a Costco and residential tower development (Vancouver) at $200 million—and the start of clean up and preparation for the $150 million Brittania Beach development, which will rejuvenate a former mining community near Squamish.

Campbell River

Elk Falls Cogeneration Project
Norske Canada Ph: (604) 287-5940
Norske proposes to install electrical generating capability at three Vancouver Island pulp mills at Crofton, Elk Falls and Port Alberni. The proposed projects were included in Norske's registration for bidding in BC Hydro's Vancouver Island Call for Tenders in Nov 2003 although details of each project are not available. However, a project at Elk Falls was described by Norske to the BC Utilities Commission hearings on the Vancouver Island Gas Plant (see separate entry) in summer 2003 as two 46 MW gas turbines and a 12 MW condensing steam turbine. The project could change depending on the outcome of the bidding process currently underway, which is expected to conclude in Aug 2004.

Campbell River

Thermomechanical Pulp (TMP) Facility
Norske Canada Ph: (250) 287-5940
Norske proposes to increase TMP capacity with a new facility at the existing Elk Falls pulp mill. Norske's registration for bidding made in Nov 2003 in response to BC Hydro's Vancouver Island Call for Tenders includes electricity generating projects at three pulp mills, at Crofton, Elk Falls and Port Alberni. A TMP project at Elk Falls was described by Norske to the BC Utilities Commission hearings on the Vancouver Island Gas Plant (see separate entry) as a 28 MW steam recovery project, along with three turbine generating projects at the pulp mills (see separate entries for Duncan, Campbell River and Port Alberni). However, the project could change depending on the selected project(s). The bidding process will conclude in Aug 2004.

VENUS Project
University of Victoria Ph: (250) 472-5364
A network of undersea sensors to provide real time information on the behaviour of these water bodies and the seafloor onto the internet. The prototype line 3 km into Saanich Inlet from Pat Bay will start construction in fall 2004 and will focus on design development of seafloor junction boxes, instrument testing, and inlet studies. Two other fibreoptic cables will be laid in fall 2005 across the Strait of Georgia from near the Twassassen ferry terminal (to measure water properties, seismic events, whale acoustics, fish migrations and the stability of the Delta, which is prone to collapse events) and across the Juan de Fuca Strait from south of Race Rocks. The first three lines received $10.3 million funding and a RFQ for a partnership that has closed with a selection expected by late Apr 2004. The University of Washingtons Applied Physics Lab is putting together a US proposal to extend the array across the entire width of the Juan de Fuca Strait. Port of Vancouver Container Expansion Project
Vancouver Port Authority Ph: (604) 665-9337
The Port of Vancouver will add an extra 425,000 Twenty foot Equivalent Units of containers (TEUs) at the port's two Burrard Inlet container terminals, Centerm and Vanterm, for a new total capacity at the Port of Vancouver of 1.97 million TEUs by 2005. This represents the first step in the VPA's overall plan to reach 4 million TEUs of capacity by 2020. By 2005, the added capacity at Vanterm and Centerm will create 1,400 new direct jobs. The throughput capacity of the facilities is expanding on the existing footprints. Vanterm will have its current capacity increased by 100,000 to 535,000 TEUs. Centerm will have its current capacity increased by 260,000 to 600,000 TEUs. Construction began at Vanterm with expansion plans at Centerm finalized in Mar 2004. In addition plans for increasing capacity at Lynnterm, a break-bulk facility on the north shore of the harbour, by converting it to accommodate containers are under review.

Prince George

Arctic Railway - Alaska to Mainland US
Ph: (907) 465-3879 (Alaska State Senator Cowdery)
Proposal for a direct rail connection of Alaska to the rest of the continental US that would pass through BC or BC and Alberta. Support has been expressed by the Yukon government, northern BC communities, and the Alberta government. A conference in Juneau identified two potential routes: north from Prince George and roughly following the Cassiar Highway to intersect the Alaska Highway at mile 649 near Watson Lake YT, or, along the Alaska Highway all the way. Both options would use existing rail lines or beds as much as possible. The US government has earmarked funds for their share of a joint commission to study the matter, however, the Canadian government has not indicated its participation. This project appears to have a very low probability of proceeding in the near future.

Sierra Yoyo Desan Resource Road
Ledcor Projects Inc/BC Ministry of Transportation
Ph: (250) 774-2541 (Regional District)
Ledcor Projects Inc. of Vancouver, a B.C.-based firm, has been selected to enter final negotiations for a partnership to design, build and finance upgrades and operate and maintain the Sierra Yoyo Desan road for 15 years. The 173-km resource road and a 15-km public road (maintained by the Ministry of Transportation) that connects to the Alaska Highway just south of Fort Nelson together form the primary access to more than 27,000 sq km.s of oil and gas territory in the northeast of British Columbia. The project consists of construction of a bypass, including a Fort Nelson River bridge to connect Highway 97 to the SYD Road, upgrade of the SYD Road consisting of selective widening and strengthening of the existing gravel road, realignment and widening of some portions, bridge replacement and related upgrades; and maintenance and operation of the road. The bridge and a new bypass will be complete and open to industrial traffic by Dec 2004. Other portions of the project construction are to be completed by Dec 2005.
